Objective

I'm looking for hands-on programming experience to help me prepare for a future career in computer science. I am currently a student at Springboard for software development with prior going through self-paced coding courses making smaller front-end webpages.

Education

Springboard Coding Camp

Self-paced coding camp.
20% complete and still learning.
October 2023

Orange Technical College

Studied pharmacology and pharmacy technician trade.
3.4 GPA
May 2020

Coding Languages

CSS
HTML
JavaScript

Experience

Rock Climbing Ecommerce Website - HTML, CSS, JavaScript

- Cliffer! A mockup rock climbing company whose website lists products for sale, a detailed description of services offered for new and experienced climbers. Uses modern UI/UX design, currently fully responsive, with a functional shopping cart and Google maps API.

Portfolio — HTML, CSS, JavaScript

- A self-created website where I display my finished projects. This contains my ecommerce website, a Connect 4 game, and a functional calculator. It also has a modern contact form connected with the Google Sheets API.

Connect 4 - HTML, CSS, JavaScript

- This was my first project where I used JavaScript as a personal challenge. I've created a classic version of the game Connect 4 that takes inputs from two users, DOM manipulation, and displays a win screen if a win condition has been met.
